

MULTI-BIN Inventory Management

ScanForce Leads The Pack In Accuracy & Efficiency.

Warehouse Focused

ScanForce Multi-Bin was created to provide true warehouse management for Sage 100 users.

Sophisticated design provides flexible setup options, powerful features, and automatic allocations to streamline data entry.

Mobile

Rugged handhelds can be used to scan location bar codes and capture data accurately at the point of activity.

Update bin quantities in real-time with wireless data transfer and auto update capabilities.

Integration

ScanForce Multi-Bin seamlessly integrates with Sage 100 and provides a simple and familiar interface for users.

Extends the standard functionality of Inventory Management, Purchase Order, Sales Order, Bill of Materials, and more.

Streamlined Inventory Management

- Sage 100 provides a great foundation as an ERP for inventory management. By adding ScanForce Multi-Bin, Sage 100 becomes a true warehouse management system. Many companies will quickly realize the need to store the same item in multiple locations within their warehouse. Fulfilling that need only scratches the surface of the functionality in ScanForce Multi-Bin.
- Streamline the creation of receiving and production entries by allowing the system to automatically designate the bin locations based on pre-defined rules. Replenishment Entry directs the user to the appropriate bin locations to put away the products, as well as restocking depleted bin locations. Perform live bin transfers as products are moved within the warehouse from bin to bin. Allocate products as orders are entered, when picking sheets are printed, or only at the time of invoicing depending on your fulfillment process. ScanForce Multi-Bin can guide the user through the most efficient path through the warehouse and greatly reduce pick times. When your business is ready, implement additional powerful features such as Container Receiving, Wave Picking, Split Picking, and more.

Why ScanForce?

ScanForce is the leading bar code scanning and mobile Warehouse & Sales Automation Solution for Sage 100. For over 15 years, ScanForce has been focused on helping Sage 100 clients manage their warehouse and business operations more effectively through the use of bar codes and mobile devices.
